DETAILED ACTION

Applicants' arguments, filed 17 December 2002, have been fully considered but are not deemed fully persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 1-4 and 30-37 are currently pending.

Prior Art

The prior art rejection under 35 USC 103(a) has been withdrawn, but may be re-applied in future actions if necessitated by amendment to the claims.

Claim Rejections - 35 USC § 112

Claims 1-4 and 30-37 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. *This is a new matter rejection.*

Claims 1, 30, and 34 have been amended to include a "means for using each of the predicted exons as a template to design one corresponding primer pair for each of the predicted exons and for designing corresponding primer pairs for the predicted exons simultaneously". However, the specification does not include such limitations and there are none apparent. The specification does provide for design of a plurality of primers from different exons by means of bioinformatics from nucleotide sequences in a database (page 5, lines 3-7). Specifically, the

Art Unit: 1631

method of primer design includes taking data on a plurality of DNA nucleotide sequences, extracting sequences of certain length, detecting conditions related to positions, selecting partial sequences meeting conditions, and determining nucleotide sequences of primers capable of specifically hybridizing (page 9, section 8). Nowhere in the description of primer design does the specification indicate that one primer pair is designed for each exon and then corresponding primers are designed simultaneously or is there a means for implementing such design.

Applicant is invited to point to page and line number in the specification for support of the amended claim language.

Claims 35 and 36 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 35 and 36 contain the trademark/trade name BLAST™. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe BLAST™ and, accordingly, the identification/description is indefinite. No claims are allowed.

Art Unit: 1631

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
